

Bunbury Industrial Controls has a great deal of experience in the automation of abattoirs and service all of the large operations located in the South West of WA. This includes Harvey Beef, V & V Walsh, Fletcher International, and Western Meat Packers. We have designed systems to monitor and control all types of disciplines found within large Abattoirs including Refrigeration, Cold Storage, Kill Floors, Boning Rooms, Packaging Machines, Rendering Plants, Effluent & Water Treatment, Telemetry Systems, Power Quality, Industrial Networks & Security and Surveillance Systems. We can also provide you with first class technicians to support and back up your plant, keeping your downtime to a minimum including 24/7 remote plant monitoring.

Engineering and Technical Services

- Control System Design Including Turn Key Solutions, Modifications & Retrofits.
- Instrumentation Selection, Supply, Installation, Commissioning and Repairs
